About Us

OUR DOCTORS

Dr Guy Kinsella

Dr. Guy Kinsella has lived in the Newcastle area for 23 years. He completed his study at the University of New South Wales and after graduation went on to spend 15 years focusing on skin cancer treatment using advanced technology.

Dr Dayalan Masi

Dr. Dayalan Masi completed his study at Sydney University, later moving to the Newcastle area where he has lived for 15 years. After graduation, Dr. Masi spent 10 years focusing on skin cancer treatment with Dr. Guy Kinsella, also growing a professional interest in laser treatment.

OUR NURSES

Jillian-Morgan

Jillian became our practice Registered Nurse in 2016, specialising in Cosmetic Nursing. Jill has undertaken extensive training specialising in anti- wrinkle and filler injections, and cosmetic and medical laser procedures.

She is outgoing and friendly, with a passion for patient care and strives to go above and beyond to ensure patients feel at ease when visiting our clinic.

Sally Kinsella

Sally is a registered nurse specialising in all things cosmetic such as muscle relaxants, filler injections and laser treatments.

With a background in beauty, Sally has a unique ability to view her clients on an individual basis and determine the best procedures for optimal results. Sally's philosophy of keeping it real and natural ensures her clients feel restored without being or feeling overdone.

Skin/Laser

HYDRATION INJECTIONS\$550 per treatment or \$1,500 for 3

V2 Beauty booster administers micro boluses of hyaluronic acid into the dermis of the skin where it positively affects dehydrated, crepey tissue that lacks firmness and fullness. The HA gel integrates evenly and leaves no residual bumps in the skin even in delicate areas like the neck or under the eyes. The added advantage of the micro needling of the HA into the skin provides the stimulation of new collagen and elastin, thus acting as a double whammy treatment. The V2 Beauty Booster can be used almost anywhere on the body from the face, under eyes, décolletage, hands or legs.

PLASMA PLAXPOT Upper \$600 / Lower \$300 per eye Non-surgical blephoraplasty Deeper Wrinkles from \$200.00

Plasma skin tightening, non-surgical upper and lower eyelid tightening (blepharoplasty) and wrinkle reduction is a new and revolutionary treatment utilizing plasma to stimulate instant contraction and tightening of the skin.

FRACTIONAL RESURFACING Full Face \$300

Used to treat fine lines, scarring, dull skin tone and skin laxity. Treatments can be performed at varying energy and depth levels and tailored to the individual's desires.

LIGHT/MEDIUM PEEL Full Face \$600

Texture, pigmentation, acne scarring, fine to medium lines, along with collagen and elastin stimulation, provides overall support and subsequent tightening of the skin. The Er:Yag laser can be used on the delicate neck area and even on the back of the hands to remove tell tale signs of damaged skin.

FULLY ABLATIVE From \$220

An alternative method to surgery for unwanted lesions. This modality will use a controlled heat to shave the lesion down to the level of the skin. The advantage of this method is the lack of scarring as no skin is excised.

4D REJUVENATION \$600

4 treatments in one. Providing a combination of Er:Yag and Nd:Yag wavelengths, 4D rejuvenation targets deep, medial and superficial structures of the skin. Tightening, volumising (wrinkle reduction) and resurfacing with no or minimal downtime.

TWINLIGHT FRACTIONAL REJUVENATION \$600

Conditioning and rejuvenation in one treatment. Suitable for all skin types and tones with minimal downtime. A Twinlight procedure combines the deeper dermal effects of collagen and elastin stimulation provided by Nd:Yag with Er:Yag ideal for brushing away surface imperfections to reveal a clearer more radiant complexion.

SCAR REVISION From \$150

Laser is ideally suited for the effective treatment of a wide range of scars including hypertrophic, keloid, and stretch marks. Laser has demonstrated substantial improvements in the aesthetic and overall appearance of scars.

ACNE From \$150

A multi-step approach to treating acne combines the use of heat to kill off the bacteria that causes the outbreak together with a light fractional ablation to remove the tough outer layer of skin that contributes to the clogging of these pores. An individual assessment is necessary to ensure the treatment plan is tailored exclusively for the individual.

PHOTO REJUVENTATION From \$150

IPL - Uses the power of light to reverse the sign of ageing. Particularly effective for hyperpigmentation, IPL has little to no downtime.

PHOTODYNAMIC THERAPY PDT Full Face \$600

Used to treat superficial pre-cancerous skin lesions. PDT uses photo sensitising agents together with light to kill off pre-cancerous cells.

WARTS From \$75

Nd:yag laser effectively uses an intense light or heat, to destroy the virus and wart tissue.

SKIN TAGS From \$40

Diathermy is an electronically induced high frequency current that produces heat to effectively and completely remove small growths of skin that appear on the body.

MICRO SKIN NEEDLING Full Face \$240 / + Neck \$290

The Ultra-Pen needling system allows for controlled stimulation of the skins ability to repair itself by creating micro wounds which triggers new collagen synthesis. The result is smoother firmer and younger looking skin.

The procedure is normally completed within 30 - 60 minutes.

PACKAGES

Buy 4 treatments

Full Face \$850.00

Full Face + Neck \$950.00

Body/Laser

VASCULAR LESIONS From \$75

Haemangiomas, spider naevi, are easily treated with Nd:Yag laser. Energy from the laser is absorbed by the blood in the vessel, converted to heat and the vein is subsequently destroyed.

ONYCHOMYCOSIS \$150 per treatment *(4 x weekly treatments required)*

Fungal nail infections are are simply and effectively treated using Nd:Yag laser to kill off the parasitic fungi. Treatment consists of weekly sessions for 4 consecutive weeks.

TIGHTSCULPT From \$300

Laser body sculpting and skin tightening. Unique Nd:Yag pulse comfortably heats the tissue to stimulate the destruction of fat cells whilst skin laxity and elasticity is improved with Er: Yag SMOOTH mode.

TRUSCULPT

The latest non-invasive technology clinically proven to provide deep uniform heating that destroys fat cells. Specifically designed to target those stubborn areas, such as under the chin, love handles, tummy and thighs, that exercise and diet alone cannot.

– Inner or Outer.....	\$500
Buttocks.....	\$650

Medical Laser Procedures

URINARY INCONTINENCE \$700 per treatment

Pensioner discounts available

IncontiLase laser is used to tighten mucosal tissue and improve the function of the pelvic floor muscles that are responsible for supporting the bladder. Different types of incontinence are addressed such as:-

- Stress
- LBL due to childbirth
- Weak pelvic floor
- Atrophy (dryness due to ageing)

VAGINAL TIGHTENING - INTIMALASE \$700 per treatment

Pensioner discounts available

Non surgical laser procedure designed to restore elasticity in the vagina vault.

BENEFITS INCLUDE:-

- Improved sensation during sexual intercourse
- Restoration of elasticity post childbirth
- Reduction of the effects of menopause such as dryness and itching

VAGINAL ATROPHY - RENOVALASE \$700 per treatment

Pensioner discounts available

The RenovaLase treatment is based on laser-induced, mild and controlled heating of the vaginal tissue, which stimulates blood vessel formation, collagen and elastin formation without thermal or ablative damage. The final result is increased tissue thickness along with a reduction of symptoms such as dryness, itching, irritation.

SNORING - NIGHTLASE \$700 per treatment

Pensioner discounts available

NightLase is a non-invasive, patient friendly treatment for increasing the quality of patient's sleep. Gentle enough to be used on the sensitive tissue inside the mouth but strong enough to provide clinical efficacious healing that stimulates the tightening of lax tissue which contributes to snoring.

Medical Procedures

BLEPHAROPLASTY / EYELID SURGERY **\$2,500**
(\$2,000.00 pensioner rate)

Blepharoplasty or eyelid surgery rejuvenates the upper eyelid by removing overlying sagging loose skin that creates a heavy, tired and aged appearance. In severe cases the skin can impair vision making it a medical condition and potentially rebatable through Medicare.

CONTOUR THREADS **\$550 per thread (up to 4 threads) / \$350 thereafter**

The Silhouette Soft Thread Lift is a non surgical facelift that uses fine threads to lift and volumise the face, neck, naso-labial, jowl, marionette and brow without the downtime and invasiveness of a surgical facelift. Silhouette threads provide structural support and lift through biodegradable sutures that actively work to stimulate collagen production over time and restore the shape of the face in a natural way.

Skin Care

Aspect Dr™

WINNER OF THE BEST PROFESSIONAL SKINCARE RANGE 2016

A new direction in active, clinical grade skincare, formulated to include gold standard ingredients with proven anti-ageing qualities but without the trauma or downtime caused by the inclusion of irritating, toxic or harmful ingredients.

Cosmelan Depigmentation Treatment.....\$1752

Effectively combining professional and home maintenance, Cosmelan works to eliminate pigmentation as well as inhibiting the formation of further production. Suitable for all skin types Cosmelan directly targets all types of pigmentation including melasma. Perfect for patients who do not desire downtime or those not suitable for laser or IPL treatments.

Cosmetic Injectables

INJECTIONS \$14 per unit

CONSULTATION:

A free consultation will be provided by our doctor and registered cosmetic nurses. A thorough explanation and treatment plan will be addressed to ensure an optimal outcome is achieved.

COMMON AREAS OF CONCERN:

- Frown Lines – “cranky lines” are the vertical lines between the eyebrows
- Forehead Lines – horizontal lines across the forehead
- Crow’s Feet – lines at the corner of the outer eye
- Eyebrow Lift – anti wrinkle injections can help alleviate a heavy eyelid and open the eye for a fresher look
- Gummy Smile – excessive gum tissue shown when smiling
- Bunny Lines – lines and creases on the bridge of the nose

HYPERHIDROSIS From \$900

With the use of muscle relaxants, we can effectively treat excessive sweating.

DOUBLE CHIN – BELKYRA

Treatments sold as packages

(MIN. 2 SESSIONS – MUST BE PURCHASED TOGETHER)

2 treatments, 1 vial \$1,500 (\$750 p/v)

2 treatments, 2 vials \$2,600 (\$650 p/v)

2 treatments, 3 vials \$3,600 (\$600 p/v)

“Surgery in a Syringe!” . . . A non surgical alternative to re-contouring the lower face in order to alleviate a heavy sub mental or “double chin”. The treatment involves injecting the fat under the chin with a synthetic version of deoxycholic acid which effectively destroys the entire fat cell. The fat is then engulfed by phagocytes which in turn is transferred by the blood stream in the liver, where it is excreted out of the body.

DERMAL FILLERS From \$450.00

CONSULTATION:

A free consultation will be provided by our doctor and registered cosmetic nurses. A thorough explanation and treatment plan will be addressed to ensure an optimal outcome is achieved.

COMMON AREAS OF CONCERN:

Lips

As we age we lose hydration, elasticity and volume in the lips contributing to an aged appearance. Lip enhancement will re-volumise the lips, restore shape and address the vertical lines that can form around the mouth known as smoker's lines.

Cheeks

Loss of volume in our cheeks creates a heavy sagging appearance of the face creating a drawn aged appearance. Restoring volume in the cheek area can improve the midface by lifting areas such as the nasolabial folds and corners of the mouth.

Marionette Lines

The appearance of downturned lines that run vertically downwards from the mouth to the chin can be corrected through dermal fillers. People feel these lines can make them look sad or older than they are.

Tear Troughs

Often recognised as dark circles under the eyes, deep tear troughs can make the patient look tired and drawn. Dermal fillers can replace lost volume that contributes to this tired look.

Jawline (Pre-Jowl Sulcus)

As we age, fat descends from our cheeks and collects along the jawline creating a heavy, drawn and sagging appearance. Filling the dent in front of the jowl creates a smooth jawline that implies youth and attractiveness.

Chin

The chin is an important aspect of the lower face. By enhancing the chin, the jawline is defined and the profile of the face is balanced.
